## ENVIRONMENTAL FEATURES

At Parade, we carry out a life cycle analysis to measure the environmental impact of each of our models: from the extraction of raw materials, manufacturing, use, logistics, right through to the end of the product's life. Our environmental impact calculators, developed in-house using ADEME's EMPREINTE® database, have been certified by AFNOR for textiles and validated by the Pôle Eco-conception\* for footwear.

\* The Pôle Eco-conception is the French national centre for eco-design and life-cycle performance. Its expertise is recognised nationally and internationally by ADEME, the French Ministry of the Environment, AFNOR, ISO and the UN-environment.

### CARBON FOOTPRINT

in kg CO<sub>2</sub> equivalent\*

<b>RAW MATERIALS</b>	<b>76%</b>
Contribution to the carbon footprint (%)	
<b>MANUFACTURING</b>	<b>15%</b>
Contribution to the carbon footprint (%)	
<b>TRANSPORT</b>	<b>0%</b>
Contribution to the carbon footprint (%)	
<b>RETAIL</b>	<b>0%</b>
